

# Restoration Technologies

LLC Of N.J

Restoration Technologies was born out of a love for history. A love particularly for historic architecture such as houses, barns, mills, and churches, and the many other long forgotten buildings and their amenities. Through these structures we can learn a great deal about our forefathers and their way of life. For this reason we are dedicated to the study, documentation, and preservation of such structures and related antique materials.

After over 15 years in the preservation field we have completed numerous restoration/preservation projects working with individuals, corporations, non-profits, and governmental agencies. With this experience comes the knowledge to safely and successfully complete your project to the highest of standards.

Offered are a wide range of services to suit all your needs, including but not limited to the following:

- Historic Restoration
- Timber Framing
- Structural Repairs & Straightening
- Building Dismantling
- Building Reassembly
- All Phases of Carpentry
- Consulting & Design
- Historic Documentation
- Historically Sensitive Demolition
- Architectural & Lumber Salvage

Restoration Technologies also offers a rotating stock of antique buildings and miscellaneous building materials (e.g. Flooring, mantels, siding).

Our Goal is to work with individuals or groups to obtain the results desired whether it be a simple piece of wood or a complete building project.
